DIAL-A-TEMP is a long lasting, solid state motor control specifically made for wood and coal burning fireplaces and stoves. It is both convenient and safe to install. Rugged construction inside and out... uses thermally protected, permanent split capacitors (PSC), universal or shaded pole motors and packaged in a handsome fire-retardant thermoplastic enclosure.

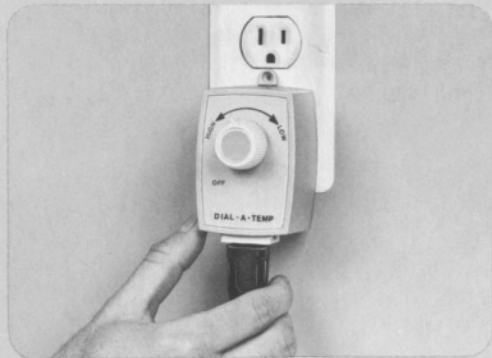

"The Right Control for Your Application"

1. Un-plug present "fan cord" from wall receptacle.

2. Plug in "fan cord" into receptacle on bottom of Dial-A-Temp.

3. Plug connected Dial-A-Temp into wall socket or into extension cord for easy access.
